QVS Software, Inc. Product Announcements

March 1, 2009

Terminal Services Version 6 will be available Q1 2009

Product Release Summary

The product release of Terminal Services Version 6 (TS V6) coincides with the release of IBM's 4690 OS Version 6 (4690 V6). TS V6 will be required in a 4690 OS V6 implementation. Previous versions of TS will not be supported in a 4690 OS V6 environment.

Planned Availability

March 31, 2009

Product Release Description

TS V6 includes the following enhancements:

- 4690 OS Version 6 Support (Legacy and Advanced)
- MTFTP Client Support (multicast pre-load support)
- Q: drive Ramdisk support
- Bundle Support
- Java 2 Enhanced Application Configuration Support
- 4610 TI8 Microcode Update Support
- 4610 2CR / 2NR printer support (4610 TI4 emul. and partial native)
- Auto 4610 Microcode Update Support
- ACE TOF support
- Support for new SurePos terminal models
- Support for 4690 Java 2 environment and Classpath

Additional features:

- A trial version of QVS InSight is included with the distribution

Product Offering

TS V6 will be available as a new license or a product upgrade.

New licenses will be offered at the same partner/customer pricing as TS V5.

Upgrades to existing TS V2, TS V3, or TS V5 licenses will be offered.

All existing QVS product currently covered under a QVS Software Support and Maintenance Agreement are eligible for this upgrade. An upgrade fee does apply.

Optionally, licensees may choose the Software Maintenance and Support Subscription Plan that includes upgrade entitlement.

Please contact your QVS representative for details on license fees and upgrade costs.

Other Terms

- TS V5 licenses purchased in calendar year 2009 will be eligible for a free upgrade to TS V6.
- TS V6 will work with older versions of 4690 OS, including V2, V3, V4, and V5. Some restrictions may apply.

The QVS family of products is the most widely installed software that permits existing IBM 4690 applications to run on Microsoft Windows operating systems.
