

QVS Software, Inc. Product Announcement

May 21, 2004

QVS Controller Services Version 3 is now available

Product Release Summary

QVS Controller Services Version 3 is a Microsoft Windows®-based solution that provides the necessary tools and subsystems to integrate the IBM 4690 store controller software as a Windows subsystem.

Product Description:

QVS Controller Services Version 3 replaces the discontinued IBM DDS/CSF product offering.

See associated Press Release dated 5/21/2004 for additional details.

The *QVS Controller Services Version 3* product provides the following functionality:

- Controller Services Feature. Provides support for 4690 controller applications on Windows without requiring code changes or recompilation. Enables application programs in the Windows environment.
- Multiple Controller Feature. Provides multiple controller support for two controllers.
- Distributed Data Services. Provides keyed file capabilities similar to those of the 4690 OS.
- Data Distribution Feature. Provides file distribution and mirrored files capabilities similar to those of 4690 OS.
- Automated Switchover Feature. Provides for an automated switchover capability in a multi-controller environment, allows backup to automatically switch to the primary role when the acting primary is no longer active for any reason.

QVS Controller Services Version 3 is certified on the following operating systems:

- Microsoft Windows NT
- Microsoft Windows 2000
- Microsoft Windows XP and 2003 Server (available in Q3 2004)

Please contact QVS Software, Inc. for additional details.
